ENERCRET GmbH

Business scope

Development and installation of alternative systems for harnessing energy for heating and cooling purposes as well as general building services technology. Exploitation of geothermal energy through the use of ground-contact concrete structures such as piled foundations and diaphragm walls which provide the earth connection for the building.

开发与安装以取暖和降温为目的的能源利用替代系统以及一般建筑服务技术。通过应用接地的混凝土结构来开发地热能源，例如桩基础和为建筑物提供土地接触的地下连续墙。
